

Free Growth & Development Screenings

Integral Care and Dell Children's Hospital provide free monthly growth and development screenings for infants and toddlers, up to age 3, to make sure they are building strong brains and bodies.

Why should you get a screening?

If your child is not talking, walking, crawling, seeing or hearing like other children their age, a screening could give you helpful information.

What happens during a screening?

A therapist or specialist will ask you questions about how your child is growing and talk with you about any concerns.

What happens after the screening?

If your child needs help, we'll connect you to services to support you and your child.

Free Screenings the First Friday of Each Month

5339 North IH 35, Suite 100, Austin, TX 78723

To make an appointment, call 512-472-3142.
